Hiring Manager / Recruitment Team

Software Engineering Hiring Group

Dear Hiring Manager,

I am writing to express my strong interest in the Java Full Stack Developer position. As a Computer Science Engineering graduate with a robust background in building scalable, MVC-compliant backend systems using Java, Spring Boot, and RESTful Microservices, I am excited about the opportunity to contribute to your engineering team's high-performance software applications.

Throughout my academic career and hands-on technical projects, I have focused on producing clean, well-structured, and reliable code. In my recent **Car Sales Analytics & AI Advisor** project, I built a Spring Boot backend integrated with Spring AI (ChatClient & Advisor APIs) to process natural-language queries and extract real-time sales trends. I designed a layered REST architecture with Spring Data JPA and Hibernate on MySQL, optimizing database queries and implementing centralized exception handling to ensure seamless operations.

Additionally, my experience extends across full-stack paradigms. In my **Smart Bank Management Software** project, I developed secure multi-role authentication, fund transfer logic, and dynamic transaction tracking using Java Collections, Servlets, JSP, and JDBC with secure session management.

Key Qualifications & Technical Highlights:

- **Core & Backend Technologies:** Java (J2SE/J2EE), Spring Boot, Spring Core, Spring Security, Microservices, REST APIs, and Hibernate/JPA.
- **Cloud & DevOps Readiness:** AWS Certified Cloud Practitioner with active practical learning in Docker, Kubernetes, and System Design principles.
- **Database & Tooling:** Proficiency in MySQL relational modeling, schema design, Git/GitHub, Postman API testing, and Agile/Scrum development environments.

I am eager to bring my problem-solving skills, strong foundation in Java development, and commitment to software quality to your team. I welcome the opportunity to discuss how my technical expertise and passion for backend development align with your organization's goals.

Thank you for your time and consideration.

Sincerely,

Anshul Yadav
